

BUSINESS SPOTLIGHT

Moffitt goes the extra mile to make great smiles

Tell us about the history of your organization.

I come from a family of dentists. My two older brothers and my father are all dentists. I have been a dentist for about 13 years specializing in prosthodontics, devoted to restoring and replacing lost or broken teeth. I focus on restoring natural smiles using dental implant, dentures, crowns, bridges and veneers. We offer personalized, state-of-the-art treatment.

I received my Bachelor of Science degree from the University of Washington and my Doctor of dental surgery degree from Creighton University.

Our faces often give the first impression of us to people. While our looks aren't everything, I enjoy being able to help restore people's smiles. Often, it boosts self-esteem or self-confidence in some patients.

Our goal is to deliver the best dental care and services to each patient, working hard to build relationships based on trust and respect. We treat our patients as a member of our family.

What do you like about the area?

We have been here for six years. I love this community and live in the community. It's a great place to raise a family. One of the things we are doing to give back to our community local and abroad is the "Treats for Troops" program where people can donate candy that we will ship overseas to members in the military.

We know a lot of patients serving in several

branches of the military and wanted to acknowledge their service to our country.

What are some trends in your industry and what does the future hold for Moffitt Restorative Dentistry?

We are in the golden age of dentistry where the best materials and most high-tech procedures that have ever been offered are available. Things are only getting better in dentistry and we strive to offer all the latest state-of-the-art treatments available.

We also offer regular dental hygiene and follow up care too.
